Plant and Soil **129**: 305–307, 1990.

Contents of Volume 129 1990

Volume 129, No. 1

J. M. Lynch and J. M. Whipps, Substrate flow in the rhizosphere 1
S. T. Lam, D. M. Ellis and J. M. Ligon, Genetic approaches for studying rhizosphere colonization 11
M. C. Hawes, Living plant cells released from the root cap: A regulator of microbial populations in the rhizosphere? 19
H. M. Taylor, D. R. Upchurch and B. L. McMichael, Applications and limitations of rhizotrons and minirhizotrons for root studies 29
A. H. Gibson, D. H. Demezas, R. R. Gault, T. V. Bhuvaneswari and J. Brockwell, Genetic stability in rhizobia in the field 37
W. D. Bauer and G. Caetano-Anollés, Chemotaxis, induced gene expression and competitiveness in the rhizosphere 45
M. J. Sadowsky, P. B. Cregan, F. Rodriguez-Quinones and H. H. Keyser, Microbial influence on gene-for-gene interactions in legume-Rhizobium symbioses 53
E. B. Nelson, Exudate molecules initiating fungal responses to seeds and roots 61
B. Schippers, A. W. Bakker, P. A. H. M. Bakker and R. van Peer, Beneficial and deleterious effects of HCN-producing pseudomonads on rhizosphere interactions 75
I. Chet, A. Ordentlich, R. Shapira and A. Oppenheim, Mechanisms of biocontrol of soil-borne plant pathogens by Rhizobacteria 85
L. S. Thomashow and D. M. Weller, Role of antibiotics and siderophores in biocontrol of take-all disease of wheat 93
J. S. Buyer and L. J. Sikora, Rhizosphere interactions and siderophores 101

Volume 129, No. 2

D. L. Painchaud and O. W. Archibold, The effect of sediment chemistry on the successful establishment of wild rice (*Zizania palustris* L.) in northern Saskatchewan water bodies 109
U. R. Bishnoi, D. A. Mays and M. T. Fabasso, Response of no-till and conventionally planted grain sorghum to weed control method and row spacing 117
B. A. Faber, R. J. Zasoski, R. G. Burau and K. Uriu, Zinc uptake by corn as affected by vesicular-arbuscular mycorrhizae 121
S. M. Boyetchko and J. P. Tewari, Root colonization of different hosts by the vesicular-arbuscular mycorrhizal fungus *Glomus dimorphicum* 131
M. Zekri and L. R. Parsons, Comparative effects of NaCl and polyethylene glycol on root distribution, growth, and stomatal conductance of sour orange seedlings 137
L. A. Kapustka and K. G. Wilson, The influence of soybean planting density on dinitrogen fixation and yield 145
J. H. Melhuish, Jr., B. L. Wong and C. J. McQuattie, A culture unit system for the study of responses of mycorrhizal and non-mycorrhizal seedlings to treatments 157
M. Faure-Raynaud, C. Daniere, A. Moiroud and A. Capellano, Preliminary characterization of an ineffective *Frankia* derived from a spontaneously neomycin-resistant strain 165

J. G. Buwalda, G. J. Wilson, G. S. Smith and R. A. Littler, The development and effects of nitrogen deficiency in field-grown kiwifruit (*Actinidia deliciosa*) vines 173
G. R. Naik, K. H. Babu and G. Lingappa, Studies on *in vitro* selection of Fe-efficient lines in sugarcane 183
A. Bakhsh, T. Flowers and I. D. Pulford, Effect of growing ryegrass on the distribution of zinc in soil pools 187
D.-M. Li and M. Alexander, Factors affecting co-inoculation with antibiotic-producing bacteria to enhance rhizobial colonization and nodulation 195
K. K. Harris and R. E. J. Boerner, Effects of belowground grazing by collembola on growth, mycorrhizal infection, and P uptake of *Geranium robertianum* 203
C. Gessa and S. Deiana, Fibrillar structure of Ca Polygalacturonate as a model for a soil-root interface. I. A hypothesis on the arrangement of the polymeric chains inside the fibrils 211
S. Okano, Availability of mineralized N from microbial biomass and organic matter after drying and heating of grassland soils 219
B. Sattelmacher, R. Kuene, P. Malagamba and U. Moreno, Evaluation of tuber bearing *Solanum* species belonging to different ploidy levels for its yielding potential at low soil fertility 227
W. T. Frankenberger, Jr., A. C. Chang and M. Arshad, Response of *Raphanus sativus* to the auxin precursor, L-tryptophan applied to soil 235
I. S. Sheoran, N. Aggarwal and R. Singh, Effects of cadmium and nickel on *in vivo* carbon dioxide exchange rate of pigeon pea (*Cajanus cajan* L.) 243
R. H. Fox, R. J. K. Myers and I. Vallis, The nitrogen mineralization rate of legume residues in soil as influenced by their polyphenol, lignin, and nitrogen contents 251
I. Cakmak and H. Marschner, Decrease in nitrate uptake and increase in proton release in zinc deficient cotton, sunflower and buckwheat plants 261
C. W. Lindau, W. H. Patrick, Jr., R. D. Delaune and K. R. Reddy, Rate of accumulation and emission of N_2, N_2O and CH_4 from a flooded rice soil 269
Z. Bialy, W. Oleszek, J. Lewis and G. R. Fenwick, Allelopathic potential of glucosinolates (mustard oil glycosides) and their degradation products against wheat 277
M. R. Lambais and E. J. B. N. Cardoso, Response of *Stylosanthes guianensis* to endomycorrhizal fungi inoculation as affected by lime and phosphorus applications 283
R. G. A. Boot and M. Mensink, Size and morphology of root systems of perennial grasses from contrasting habitats as affected by nitrogen supply 291
